August 1, 2013

As you are well aware, commodity costs in general have varied significantly throughout 2011 and 2012. Specifically, as it relates to Nickel, the July 2013 LME Nickel Cash Average Price was above our base of \$3.00/LB and for Copper the July 2013 LME Copper Cash Average Price was above our base of \$0.50/LB. Also, the typical surcharges are in place for Iron, Chromium, and Aluminum and have been adjusted for the coming month. Consequently, the following metal surcharges will apply for all orders shipped during the month of August 2013.

For illustration of how the surcharge is calculated, the July LME Nickel Cash Average Price was \$6.22/LB (Copper was \$3.13/LB). This yields an 80% Nickel wire surcharge as follows: $(\$6.22 - \$3.00) \times 1.25 \times .80 + \$0.34 = \$3.56/\text{LB}$ of wire. The 25% adder is present to cover the transaction fees, [contango](#) charges, insurance and delivery of the metal that is billed to us. It is also to cover the losses of material that occur when melting known as "stack losses". Hyndman always bills only the surcharge charged to us by the wire mills. Always confirm the surcharge applied to your transaction when dealing in any product based on the price of these metals.
